

TURN ME LOOSE

153-3 :: Coincidence or Fate?

He is a littermate to "Perfect Game", the Reserve Champion Duroc Boar and high seller at \$19,000 to LVS from SWTC. He is also a maternal half sib to RWG "Logic" and RWG "Different Stroke". Turn Me Loose is notched 153-3.

The last time we had a Herd Sire notched 153-3, was RWG "The Right Move". Coincidence or fate, I believe, Turn Me Loose is the best Duroc Barrow Sire to come along since The Right Move who sired champions at county, state, and major shows all six years of use at RW Genetics. The Right Move died in October 2009 at eight and a half years of age. It was tough to lose this Duroc Legend, but feel very confident Turn Me Loose can respectfully fill his hooves.
